*ilili*_____

We'd love to see your ideal combination

ILI_ILI (EITHER_OR) is a series of modular pendant lamps. The line consists of six different elements which can easily be combined in various ways by simply linking them together, enabling customers to create a number of different lighting fixtures according to their preference.

The aluminum parts are all handmade and powder coated in twelve different matte colors. This offers an extensive choice of combinations and colors – and as the lamp name states – the elements can be mixed and matched EITHER this way OR the other. ILI_ILI (EITHER_OR) is an unfinished lamp that invites you to give it a final touch of yourself.

Every lamp is handmade and assembled in Croatia under close supervision of our designers to make sure that your lamp is not just beautiful but precision crafted as well.

ili_ili comes in many shapes and you are free to choose yours.

GRUPA PRODUCTS is a unique Croatian product design brand run by Grupa, a trio of designers involved with the design scene since the late 2000's through a variety of different kinds of collaboration, commissions and competitions, which overall resulted in a string of successful products designed, prestigious awards won, and earned them a place among top product designers in Southeast Europe.

As developing new products is often a lengthy process involving many different parties, Grupa decided to realise some of their ideas independently all the way from the drawing board to the finished product, avoiding the usually long wait for all the pieces of puzzle to fall into place. This is how Grupa Products brand was born—from the collective's need for urgency and immediacy in executing designs they truly believe in.
